

"Verba volant,

OMNIA LINGUA

TRANSLATION PRICE QUOTE

scripta manent"

Since 2009, OMNIA LINGUA aimed to bring a positive change in the field of translation respecting the quality standards imposed by the clients. The translations performed by the OMNIA LINGUA team are like a business card, communicating correctly the message in the target language and offering an identical layout with that of the original work. We include here DTP services: editing and graphics (pictures) insertion and resizing.

Over time, we have carefully observed the requirements of our clients, while striving to meet them successfully. Among these we mention: the quality of the translation, compliance with the deadline, performing urgent translations in short deadlines, a fair price/quality ratio and an efficient purchasing system so that a translation can be obtained in the shortest possible time. Our offer includes FREE 24H courier service and payment methods through internet banking. It is, therefore, no longer necessary for the client to come to our headquarters to pay and pick up the translations.

Each project has its particularities, requiring experience and professionalism in translating documents. Our translators and interpreters are certified by the Ministry of Justice, some of them being native speakers of the target language, graduates of the Faculty of Foreign Languages and Literatures and of other foreign universities, specialists in the technical, legal, medical, economic, financial, literary, IT and marketing fields, with extensive experience in translations.

The consistency of the translation is ensured by the use of translation tools, a comprehensive database and specialized dictionaries. All translated texts are subsequently checked by a second certified translator so that the translation conforms to the original.

"S.C. OMNIA LINGUA S.R.L." meets the conditions of your best collaborator: high standards of quality standards, correctness and fidelity of translation, delivery of the work on the scheduled date, guarantee of data confidentiality and, last but not least, competitive prices.
